

Delamere Visitors Centre - 4th December 2011

Well, the weather was 'reasonable' so we decided to risk it!

Janet led about 10 of us away to explore the vagaries of the new pedestrian lights and cycleway paths along the **A5117** and 11ses at **Oscroft**, before taking a very gradually height gaining route to the **Visitors Centre at Delamere**.

It was packed out with walkers, mountain bikers and dog owners.
After an excellent lunch our luck, especially mine, really ran out.

1, 2 and 3 pieces of glass on the cycleway!

Don't mention the 'p' word to Bob!

Freezing rain hampered our progress through the forest and I succumbed to 3 punctures in fairly quick succession due to, I finally found out, broken glass on the cycleway. By now we were so wet and cold that Jill rode on to fetch the car from The Tudor Rose car park and finally rescued me near **Capenhurst!**

A ride home I wish to forget.

Anyway, **thanks for the ride Janet** and the attached Garmin route.

Bob Witton
